ENGINES - PCC Motor

Slowly kick engine over until the kick start reaches a compression stroke (the point in which the kick start lever is hardest to push down.). These motors need a strong, quick kick to get started. A small blip of the throttle maybe used when the engine is hot if required but NO more than 10 ° opening of the throttle in any case.

If you fail to follow this procedure, especially with longer stroke engines or 125cc + bores you can cause serious damage to your crankcase, clutch and transmissions assemblies! Tips to Avoid kickback . Hold onto the crossbar pad with your throttle hand while kicking the bike over to avoid twisting the throttle open by accident
