2008 115 HP Mercury EFI 4-stroke fuel problem. Engine recently just started running extremely poorly. At one moment cruising along at 4500 to 5000 rpms the next moment hard to keep from dying then back to running just great. Could a low and/or high pressure fuel filter, fuel module, fuel injectors or 7 be the problem.

Re: Propeller 115hp 4 stroke 2008 Mercury Not an expert:: but its difficult to know exactly where your at without your max rpm and speed.After checking the 115 Etec(has lots of different boat performance reports) makes a great reference point.90% of their tests are running 17 in props planing times were between about 4 sec. and about 8 sec.

Propeller 115hp 4 stroke 2008 Mercury | Boating Forum ...
Mercury 115 HP EFI ... Mine is a 2008 model 75 with around a hundred faultless hours on it to date. It pushes my 5.5 meter plate hull along with ease at around 45 KMH which sees it at about 4000 - 4200 RPM on smooth water and well under the top end RPM limit - plenty fast enough for me.

Mercury 115 HP EFI | ProductReview.com.au
The OptiMax is the first direct-injection 115 to meet California Air Resources Board (CARB) 2008 exhaust emission regulations, whereas the Evinrude 115 Di currently meets only CARB 2004. The OptiMax 115 can also be fitted with TrollControl to reduce engine revs to only 400 for slow-speed trolling and is SmartCraft-compatible, giving fuel flow and range to empty info.

Embrace Possibility. Mercury FourStroke outboard motors are incredibly powerful and efficient, and they feature a wide range of applications. Crafted for less weight and high displacement, they generate abundant torque and immediate power. And because they don't have to work as hard as heavier engines or those with lower displacement, they make boats plane faster and accelerate better, and ...
