If you want the object to follow a more interesting path, you can use a motion guide to steer it. To create a motion guide: Motion-tween an object from one point to another. (Motion guides don't work with shape tweens.) It doesn't matter where the object starts and ends; you'll adjust that later. Select the layer in the Timeline that contains the tweened object, and click the Add Motion Guide icon . A new layer appears, with the layer you selected indented beneath it.

#40 Using Motion Guides - Adobe Press | Adobe Press

Animate CC creates two types of tweened animation: motion tweens and classic tweens. Motion tween is a type of animation that uses symbols to create movement, size and rotation changes, fades, and color effects. Classic tween refers to tweening in Flash CS3 and earlier, and is maintained in Animate primarily for transition purposes.
