Gerontologists

investigate age, aging, and the aged.

Gerontologists study what it is like to be an older adult in a society and the ways that aging affects members of a society. As a multidisciplinary field, gerontology includes the work of medical and biological scientists, social scientists, and even financial and economic

A longer life represents an important opportunity, not only for older people and their families, but also for societies as a whole. Additional years provide the chance to pursue new activities such as further education or a long neglected passion, while continuing to make valuable contributions to family and community.
