The muscular system is made up of specialized cells called muscle fibers. Their main function is

contractibility. Muscles, connected to bones or internal organs and blood vessels, are in charge for movement.

types of muscle tissue  
are: skeletal, cardiac

and smooth muscles.

Skeletal muscles can  
be moved voluntarily

and are important for  
maintaining body

temperature, by

generating heat. The

cardiac muscle is

present only in the

heart and can contract

without neural

stimulation.
