It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

Ask Proxima will not start up If it has no power at all or has power but fails to start, it is most likely the power supply needing to be upgraded or replaced. If you look at the projector with the top off, there should be a green wire going from the top of the main board (it is soldered to a orange cap in a group of 4) leading to the underside of the power supply.
