books by famous authors like, William Shakespear, Stefen Zwaig, etc. that gives them an edge on literature. Created by real editors, the category list is frequently updated.

Carbon Monoxide

Carbon monoxide has a computed fractional bond order of 2.6, indicating that the "third" bond is important but constitutes somewhat less than a full bond. Thus, in valence bond terms, $\text{C}\equiv\text{O} +$ is the most important structure, while $:\text{C}=\text{O}$ is non-octet, but has a neutral formal charge on each atom and represents the second most important resonance contributor.

Carbon monoxide - Wikipedia

Carbon monoxide is a colorless, odorless, tasteless gas produced by burning gasoline, wood, propane, charcoal or other fuel. Improperly ventilated appliances and engines, particularly in a tightly sealed or enclosed space, may allow carbon monoxide to
