Control: A History of Behavioral Psychology by John A. Mills

Behaviorism has been the dominant force in the creation of modern American psychology. However, the unquestioned and unquestioning nature of this dominance has obfuscated the complexity of behaviorism. Control serves as an antidote to this historical myopia, providing the most comprehensive history of behaviorism yet written. Mills successfully balances the investigation of individual ...

"[Control: A History of Behavioral Psychology]" by Mills ...

In psychology, the theory of planned behavior (abbreviated TPB) is a theory that links one's beliefs and behavior.. The theory states that attitude, subject norms, and perceived behavioral control, together shape an individual's behavioral intentions and behaviors.

Theory of planned behavior - Wikipedia

For 3 of 4 subjects, the differences persisted for 20 or more sessions. Previous demonstrations of behavioral history effects have been confined largely to between-subject comparisons. By contrast, the present results demonstrate strong behavioral effects of schedule histories under stimulus control within individual subjects.

Stimulus control of behavioral history.

Behavioral Psychology. Early work in the field of behavior was conducted by the Russian physiologist Ivan Pavlov (1849–1936). Pavlov studied a form of learning behavior called a conditioned reflex, in which an animal or human produced a reflex (unconscious) response to a stimulus and, over time, was conditioned to produce the response to a different stimulus that the experimenter associated ...
