Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

Democracy At Risk How Political

Democracy at Risk is an accessible well-written look at what it would take to transform the United States into a vibrant democracy. A group of leading political scientists assembled by the American Political Science Association collaborated in assembling what we know about why Americans don't participate and what it would take to engage them.

When Trump won in 2016, there was a general belief among experts that while he would test U.S. democracy (and certainly make the United States even less democratic for Black people, immigrants and other racial and ethnic minorities), he likely wouldn't lay waste to it entirely. American institutions were too strong, the theory went, for a single leader to totally destroy them.
