The priority rules are often called the Cahn-Ingold-Prelog (CIP) rules, after the chemists who developed the system. The general strategy of the E-Z system is to analyze the two groups at each end of the double bond. At each end, rank the two groups, using the CIP priority rules, discussed in Ch 15.

The rigorous IUPAC system for naming alkene isomers, called the E-Z system, is based on the same priority rules. These priority rules are often called the Cahn-Ingold-Prelog (CIP) rules, after the chemists who developed the system. The general strategy of the E-Z system is to analyze the two groups at each end of the double bond.

I purchased this book after previously using the E-Z Rules for the Federal Rules of Evidence 2e. While this book is still incredibly helpful, it needs to be updated. It is written to the version of Article 2 that were in effect in 1990, however, does not match completely the amendments that were made in conjunction with the updating of Articles 1, 5, 7, and 9.

The general approach of the E-Z system is to observe the two groups at the end of each double bond. Then, analyze that the higher priority group at the one end of the double bond and the higher priority group at the other end of the double bond are on the same side (Z, from German *zusammen* = together) or the opposite sides (E, from German *entgegen* = opposite) of the double bond

If both of the groups on one side of the double bond are the same then both drawings of that molecule represent the same configuration. E and Z are only necessary to differentiate the isomers of a molecule. All you'd have to do is flip the entire diagram over and you'd get the other one.

When four nonidentical groups are attached to a double bond in an alkene, you must use the E/Z system of nomenclature to assign the stereochemistry of the double bond. (E stands for the German word entgegen, which means "opposite," while Z stands for the German word zusammen, which means "together.") To use the E/Z system of nomenclature, you have to play a game of high-low.
