The Guidelines for the investigation of gastrointestinal illness (1998), reviewed and amended in 2010, has now been updated and re-drafted to include best practice infection control recommendations and further detailed information for the investigation of sporadic cases of gastroenteritis and food or water borne outbreak investigations.

Guidelines for the investigation of gastrointestinal illness
Food poisoning is an illness which occurs when you've eaten food contaminated by an infectious organism, such as salmonella, listeria, or E. coli. This can occur with undercooked or improperly handled food. Symptoms typically appear eight to 12 hours after eating and can last for one to two days. Food poisoning begins with abdominal cramping.
