If 0 Is It No

In my case, D32, can only either be 0 or a positive number, never negative. So in a nutshell if its ever a positive number then run my IF statement as is, but if its 0 then i just want the cell to return 0 and not run the IF. I have tried running a nested IF in there to say something like IF(D32=0),0 but i get errors saying i cannot do that.

If statements, if 0 do not calculate, but put 0 ...

0 is the integer immediately preceding 1. Zero is an even number because it is divisible by 2 with no remainder. 0 is neither positive nor negative. Many definitions include 0 as a natural number, in which case it is the only natural number that is not positive. Zero is a number which quantifies a count or an amount of null size.

0 - Wikipedia

Zero to the power of zero, denoted by 0^0 , is a mathematical expression with no

When I go to start the task scheduler, I get this message "the selected task "{0}" no longer exists. to see the current task, click refresh" So I go ahead and click refresh, and get the same error

Error message: the selected task "{0}" no longer ...

The situation with $0 \cdot 0$ is strange, because every number x satisfies $0 \cdot x = 0$. Because there's no single choice of x that works, there's no obvious way to define $0 \cdot 0$, so by convention it is left undefined. \square
Of course, there are many possible counterarguments to this.

The formula method is pretty straight forward, with one minor issue: You specified NO for less than zero and YES for greater than zero, but it is not clear what you want as a result when E12 equals zero. This formula should meet your requirements and return a blank cell if $E12 = 0$ =IF (E12<0,"NO",IF (E12>0,"YES", ""))

[Solved] Excel - If greater or less than zero then YES or NO

The safest thing is to state whether you are including 0 or not when talking about Natural Numbers. You could write it something like: "The Natural Numbers (taken as 1,2,3,4,...) are blah blah blah."

But zero is different, zero is defined as nothing so if you have nothing and you have nothing to divide it with, then nothing will happen $0/0=0$. The next argument of $0/0=0$ seems correct to me because if you have nothing, you cannot divide it by something, therefore the answer will always be 0. Around.

number at its original value.

Zero | Definition of Zero at Dictionary.com

Zero is a number used in mathematics to describe no quantity or null quantity. When there are 2 apples on the table and we take the 2 apples, we can say that there are zero apples on the table. The zero number is not positive number and not negative number. The zero is also a placeholder digit in other numbers (e.g: 40,103, 170).
