The collections also include classic literature and books that are obsolete.

Klipsch Ifi Repair

I have a similar problem with the power supply on my ifi not lighting up. Measured 118V good at plug, and after switch. No fuses ever blown. MOV1 intact. Measured 1.7W on primary windings (Red) and 0.5W on secondary coil (yellow / brown), so transformer appears intact.

IFI Repairs after warranty? - The Klipsch Audio Community

With Klipsch replacement parts such as subwoofer drivers, you need to check to see if they come with a foam kit. When looking at replacement speakers, you should check to see if the type will work with your existing system.

I have a Klipsch IFI 2.1 Speaker System for iPods (Discontinued). It has been off for a few months and now it does not power up - no power on LED glowing on the back panel and the iPod dock control does not light up either. The internal 2A fuse is fine, and 115V AC is going into the fuse clips. I can't go any further in without electricueting ...

I had a 4.1 system that had the BASH amp fail. I sent it to Klipsch for warranty repair. They couldn't get parts so they sent me a complete new Promedia Ultra 5.1 system. I put a 3/4" plywood back and =/- connector on the 4.1 sub and hooked the entire setup to my crappy Sony HTIB receiver. It was much better than the Sony speakers and worked fine.
