Publications - Birkmayer USA

Neuropharmacology publishes high quality, original research within the discipline of neuroscience. The emphasis of Neuropharmacology is on the study and understanding of the actions of known exogenous and endogenous chemical agents on neurobiological processes in the mammalian nervous system. Work with non-mammalian and invertebrate species may be considered in exceptional circumstances.

...

The journal presents research in basic and clinical pharmacology and related fields. It covers biochemical pharmacology, molecular pharmacology, immunopharmacology, pharmacogenetics, analytical toxicology, neuropsychopharmacology, drug metabolism, pharmacokinetics and clinical pharmacology.

Research Trends

Background . Introduction of old and new generations of antipsychotics leads to significant improvements in the positive symptoms of schizophrenia. However, negative symptoms remain refractory to conventional trials of antipsychotic therapy. Recently, there were several open clinical human trials with curcumin. Curcumin is a natural polyphenol, which has a variety of pharmacological activities ...
