### Education - R.E. Mason

Peak values (PeakVue) are observed over sequential discrete time intervals, captured, and analyzed. The analyses are the (a) peak values (measured in g's), (b) spectra computed from the peak value time waveform, and (c) the autocorrelation coefficient computed from the peak value time waveform.

### White Paper: PeakVue Analysis for Antifriction Bearing ...

PeakVue measures the highest amplitude found in this waveform and holds it as the highest value during a waveform time length equal to one over the sampling rate. PeakVue also passes the waveform data through a high pass filter to remove the rotational vibration frequencies from the data. However, filtering is its only real similarity to
