PROS: This is a good overall book for those who are new to Windows CE 6.0, and who want to write for Windows CE. It is expected that the reader knows C/C++, and to some extent about Windows programming specifically, but Boling does a good job of not assuming the reader knows much about operating systems.

Could anybody tell me is there any way to create C# application in Visual Studio 2015 to mobile device with Windows CE 6.0 (with .NET framework 3.5 compact)? I found SDK for VS 2008 only. Regards,

c# - Visual Studio 2015 - programming for Windows CE 6.0 ...

I have a problem with a GPS device: it runs windows embedded ce 6.0 and I am trying to make the GPS software (iGO Primo) run by default (automatically run on startup). I have tried copying the shortcut to \Windows\Startup folder, but on restart it was gone. I guess it does not have a persistent file system.

Add autorun on startup program in windows embedded ce 6.0 ...
