These assets play a key part in the financial planning and analysis of a company's operations and future expenditures. As the loan is secured by an asset, asset-based lending is considered less risky compared to unsecured lending (a loan that is not backed by an asset or assets) and, therefore, results in a lower interest rate

What's the Difference?

Taking effective security over an asset means that the bank can, on the insolvency of the borrower, take possession of that asset, sell it and use the proceeds to repay the loan. This puts the bank in a stronger position than creditors who do not have security.
