The magnificent snow leopard is native to northern and central Asia, and can be found in China, Russia, Afghanistan and several other countries. Over 60% of the world's snow leopards live in China. They are at home in the Himalayan mountains, and live in snow covered peaks as high as 17,000 feet in elevation.

### **Snow Leopard Facts - Animal Facts Encyclopedia**

Formerly classified as *Leo uncia*, the snow leopard has been placed—with the lion, tiger, and other big cats—in the genus *Panthera*. Because of the presence of certain skeletal features, such as having a shorter skull and having more-rounded eye orbits than other big cats, the snow leopard has also been classified by some authorities as the ...

The Big Snow tells the story of how the woodland animals prepare themselves for the upcoming winter. The animals after seeing the leaves fall down and how fast the days begin to darken they know that it is winter time, as a result the geese fly south looking for sunshine and clear sky while the rest who had to stay also start to get ready to the cold weather for example some animals big and small growth thicker fur, others dig under the ground to keep warm but the most important is that all ...

### **The Big Snow - Wikipedia**

The Big Snow of '47. Anyone who lived through the blizzard of 1947 will always have it engraved on their memory. The harsh conditions and the scarcity of fuel and food made life difficult for both man and beast. The harsh weather began at the end of February 1947 and continued well into the month of March. The snow and wind was quite severe on the last Friday in February.

\*\*Description from Amazon: The woodland animals were all getting ready for the winter. Geese flew south, rabbits and deer grew thick warm coats, and the raccoons and chipmunks lay down for a long winter nap. Come Christmastime, the wise owls were the first to see the rainbow around the moon. It was a sure sign that the big snow was on its way.
