### Timing Marks For 1972 1

Re: Timing marks 1972 1150... Timing marks on the older motors were on the cowlng support. The cast arrow on the distributor pully should point to the three dots (or one dot), when the TDC mark on the flywheel matches the timing mark on the cowlng support. Adjust timing belt to make it so. To time it, remove all but #1 spark plug.

### Air-cooled Volkswagen timing figures Engine timing figures

Remove the access plug, turn the crankshaft until the timing mark on the crankshaft damper indicates TDC, and observe that the timing mark on the camshaft drive sprocket is aligned with the pointer on the inner belt cover. Also, the rotor of the distributor must align with the No. 1 cylinder firing position. CAUTION:

### Timing marks for a 1972 ford pinto 2.0 - Fixya

If the timing mark is at 2 degrees or 10 degrees to the left (CCW), the marks would be at 1:26 and 1:10, respectively. The pre-1969 damper has the TDC line on the outer ring at the 2:30 o'clock position- or 2° before the keyway centerline- i.e. the line is to the LEFT of the keyway, looking at the front of the damper or engine.

### 1970-75 Chevrolet Tune-up Specifications

The mark closest to fin #7 is the idle timing mark for a 1.8L. It is probably 7.7° by the inner edge of the fin. Very small differences by 1-2 degrees through the years. That will make no difference. Yes...putting the red mark on fin #10 is a good idea. That is 27° BTDC. Why the factory used 27° BTDC.....is an excellent reason.

Once the timing marks are lined up install the distributor so the rotor falls under the number one terminal in the cap or very close to it. Once that is done turn the distributor slightly so the timing is retarded by a few degrees. Turn on the key (important) and place the number one spark plug wire about 1/8 of an inch from the number one ...
