In this guide I will be demonstrating how to install Linux on the Linx 1010B tablet, a low-cost 10-inch Windows 10 tablet. It uses the Bay Trail chipset, which has a history of causing frustration when trying to boot Linux, particularly because although it features a 64-bit processor, it uses an EFI system that only operates in 32-bit. Linux support for the hardware in general is not perfect ...
