When purchasing wires to use for a custom trailer wiring harness,

# Download Free Vehicle Wiring Harness Guideline

you have to ensure your cables can withstand fire, abrasion, vibrations, corrosion and extreme temperatures. One way to ensure this is by getting heat-shrink collars galvanized wire clips to make the wires firm and straps to pack the cables together.

Using the wiring code the adapter manufacturer supplies, these harnesses enable you to match up the wires for each connection to the new stereo's wiring harness. Once that's done, you plug the other end of the harness into your car's wiring connector (the one that was plugged into the factory radio).

Most terminals are color coded for size. Red is the smallest, fitting 22- to 18-gauge wire; blue is for 16- to 14-gauge wire, and yellow is for 12- to 10-gauge wire.

# Download Free Vehicle Wiring Harness Guideline

Anything bigger is sold by the size, not color. Primary wire is typically an 18-gauge wire and is the most common wire found in wiring harnesses.
