turtle.textinput() function in Python - GeeksforGeeks
TextInput has by default a border at the bottom of its view. This border has its padding set by the background image provided by the system, and it cannot be changed. Solutions to avoid this is to either not set height explicitly, case in which the system will take care of displaying the border in the correct position, or to not display the border by setting underlineColorAndroid to transparent.

inputId: The input slot that will be used to access the value.: label: Display label for the control, or NULL for no label.: value: Initial value. width: The width of the input, e.g. '400px', or '100%'; see validateCssUnit. placeholder: A character string giving the user a hint as to what can be entered into the control.

Shiny - textInput
As it's said above, the TextInput requires some minimal space for the text. It's not like it's required for every text-based widget, only for TextInput because you can add how many Labels/Buttons/… you like. However, TextInput stops after the 41st one in the 600px window (for me at least) and shows, that each TextInput requires 18 - 19px width.

TextInput - a minimum size is required for text(generates ...
