Postural Management and Good Sitting Posture - What's All ...

Ergonomic seating differs from traditional seat slope as it creates the shape through bending the material that the frame is made from, so it is more like the profile of the person. Since most wheelchair users benefit from some measure of seat slope, ergonomic seating offers an alternative that promotes improved posture and function.

Ergonomic Seating and Manual Wheelchairs

Good posture begins with the pelvis - the most important feature of any postural support system is its ability to align or accommodate a range of pelvic positions. The JCM specialist seating systems offer adjustable sacral positioning that can optimize or accommodate specific positions of the sacrum.
